

Up300+

High speed scanner fully upgrade

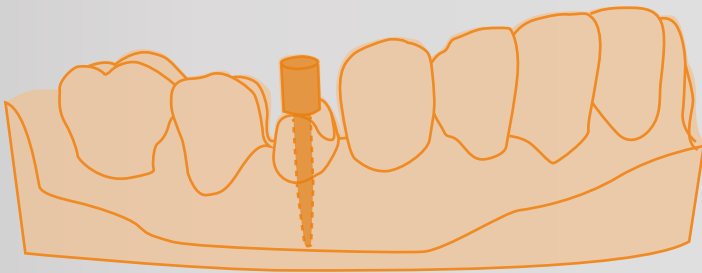

Hardware upgrade | Software upgrade | Function upgrade

01

Unsectioned model scanning performance improving

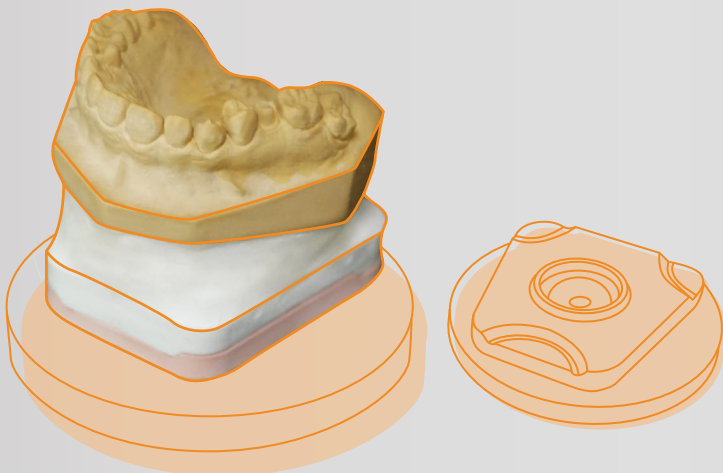

The fastest scanner specialized for unsectioned model

02

All-round solution for post&core scanning

No need to make post&core wax, just need the scan body of post&core

03

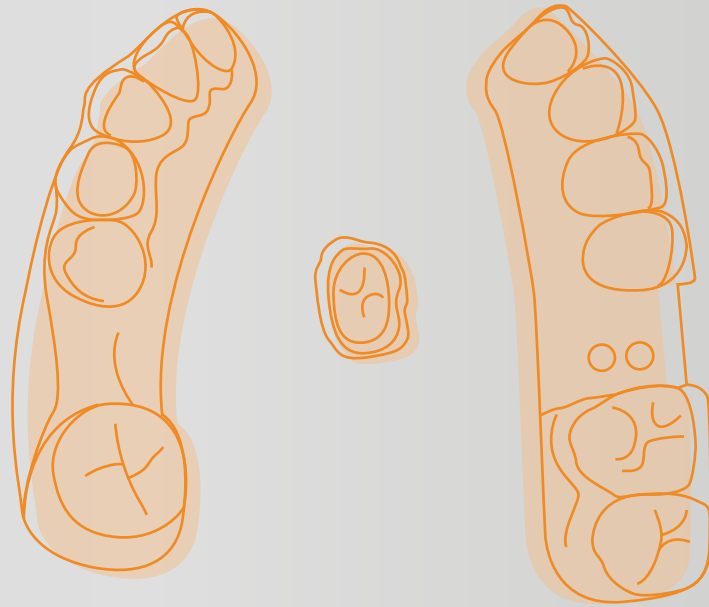

Articulator free for scanning big articulator

Get occlusion Easily without scanning articulator

04

High speed

Compared with the scan method of traditional scanner ,
UP300+ will help you increase 50% of work productivity

05

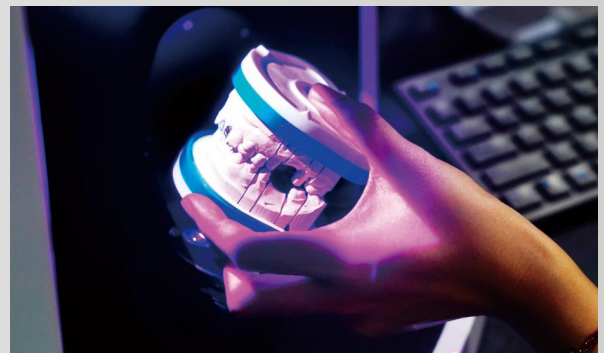

All-in-one model scan

Compared with traditional scan method,
UP300+ will help you save 50% of working
time by scanning a simple jaw with two steps only

06

New way of occlusion scan

Fast and simple

Model	UP300+
Size	300*300*400 (mm)
Weight	10kg
Scanning range	100*100*75 (mm)
Scanning method	Non-contact blue light scan
Camera	2*1.3 (MP) High frame rate
Projection	Customized Blue-light, support multi-color scanning
Interface	USB 3.0
Power supply	110V-240V, 50HZ
Speed	Full arch 20s, 12 unit dies 26s
Precision	<10 microns
Output format	STL; PLY; OBJ
Automation	Automatic calibration, Intelligent hole filling
Adaptation	Plaster, Impression, Wax bite, Scan body, True color texture, Orthodontic, Multi-dies, Big articulator
